Answers your questions :

Q : WHEN TO APPLY?

A : Any time of year. For best results apply in dry conditions.

Q : APPLICATION? (for Algon concentrate)

A : For best results choose a day when the surface to be treated is dry and rain is not expected.

Dilute 1 part ALGON to 3 parts water.

Apply with either a garden sprayer on droplet setting, soft broom or paintbrush wetting the surface evenly.

n.b. A watering can may be used but can be wasteful. Leave to dry; results will show in a few days.

Q : DO I RINSE IT OFF LATER?

A : Absolutely no need

Q : WHAT ARE THE RESULTS?

A : The surface should start to clear within a few days, helping restore the natural colour.

Q : HOW LONG WILL THE TREATMENT LAST?

A : Approximately one year; this depends on the absorbency of the material being treated, its location and the weather conditions.

Q : WHAT ABOUT MY PETS, POND FISH AND WILDLIFE?

A : ALGON is **non-toxic** and safe for pets, wildlife, horses and other animals. A small amount entering pond water will not harm fish or plant life; however, care should be taken to keep run-off to a minimum when working around ponds.

Q : WHAT ABOUT PLANTS?

A : Algon will have a scorching effect on foliage/grass only where it makes contact; this will not harm the rest of the plant. Roots will not suffer from incidental run-off during application.

Q : CAN I USE ALGON IN WATER FEATURES?

A* : Yes but care should be taken to keep run-off into water to a minimum

Q : STORAGE?

A : Algon has a shelf life of many years.

Q : CAN I PAINT OVER ALGON?

A : Yes, Algon will not affect any type of paint or stain.

Q : WHAT AREA WILL IT COVER?

A : 2.5lt container - 60 sq m (650 sqft) eg driveway 4 cars long
20lt drum - 480 sq m (5,000 sqft) eg tennis court
