

Artificial turf maintenance specialists, *sweeping the country!*

## The Sweepfast Hand Brush

The smallest brush in the range of drag brushes designed and manufactured by Sweepfast specifically for maintaining sand filled or sand dressed artificial turf.

It is made of aluminium and powder coated steel with interchangeable brush strips housed in aluminium carriers. The brush is weighted down with either one or two suitcase type weights and can be pulled by either one or two people. When used in conjunction with Cleansweeps and Greensweeps it gives small clubs and private individuals a method of maintaining their own courts reducing the need for professional contract services.

VAT Registration No. 833 3082 48 Company Registration No. 5099315. Registered office as below.
